

The Finest Leaves, The Obvious Choice.

Olive Leaf

-- FROM OUR ORCHARDS --
--- TO YOUR TEA CUP ---

Drinking tea from the leaves of Manzanillo and Mission olive trees has been a method employed for thousands of years as a homeopathic remedy in the Mediterranean and wherever the olive tree grows. The olive tree provides a powerful natural tool to fight colds, coughs, sore throats and over one hundred viral and bacterial conditions. Olive leaf is a caffeine free organic antioxidant (similar to Green tea) that has also been shown to lower blood pressure, reduce cholesterol, improve respiratory response and improve skin health. Olive leaf works by disabling infections long enough to balance the bodies' "bouquet" so the immune system can eliminate them. Olive Leaf tea is flavorful itself and mixes well with many other herbs & flavorings.

Delicious, Unique Flavor

Olivus olive leaf tea tastes like nothing else. A light steeping delivers a satisfying mellow flavor. Longer steeping or brewing in a tea press creates a stronger, slightly bitter infusion than can be mellowed with a slice of fresh lemon, stevia, soy, milk, sugar and other herbal flavorings. Serve hot or chilled. Olive leaf also blends well with Green and other teas.

The Science of Olivus

Oleuropein, a compound present throughout the entire olive tree, has been determined to be a major part of the tree's ability to resist pests and disease. In turn, oleuropein itself contains elenolic acid and calcium elenolate, which work synergistically to repel a wide spectrum of microorganisms. Olive leaf disables the virus or bacteria long enough for our natural immune systems to cleanse the body. A slowdown of the organism's spread allows the immune system to go on the attack.*

Natural Health Beyond Antibiotics

There is no doubt that the oil and fruit from olive trees is a delicious and healthful part of our diet leading one to wonder what else does this noble tree have to offer? In recent decades the over use and abuse of antibiotics and the growing number of drug resistant diseases has prompted investigations into potent yet more natural anti-microbials. Olive leaf tea appears to have stood the test of time in many minds as one approach to keeping the body healthy. Medical professionals are unclear how the olive leaf knows how to target so many specific conditions but comment that it appears to act like a natural antibiotic, without building resistance. Olive leaf tea can be enjoyed regularly as a preventative or used directly to combat ailments. Serve hot or chilled.

A Noble History

There is a degree of mystery surrounding olive trees. They can live a long time (some over 3,000 years) by producing Oleuropein, which resists diseases and pests. According to Greek mythology, it is the Goddess Athena to whom the existence of olive trees is attributed, for it is she who first planted one among the rocks of the Acropolis and bestowed upon it "powers to illuminate the darkness, heal, and provide nourishment". There are mentions in the Bible about the trees healing properties, "the leaf there of for medicine", and "the tree of life". Our orchard is all mature Manzanillo and Mission olive trees grown organically, cured and packaged on site.

Olivus is safe and there is a 100% money-back satisfaction guarantee on all our products!

What Professionals are Saying:

Dr. James R. Privitera, M.D., a physician in Covina, California, began using Olive Leaf early in 1995. "I think we are just beginning to scratch the surface for what seems to be a very promising and unique herbal with multiple applications," he says. "We continually hear from patients about new and unexpected benefits. Although we do not have long term perspectives as yet, preliminary clinical results are very positive."

Dr. Morton Walker: "Since the beginning of time there has been only one remedial treatment that has worked by itself to win the fight against viruses, Flu, fungi, parasites and bacterial infections. It's been used as a cure-all for thousands of years - a phenolic compound known as Oleuropein, the source of powerful disease resistant properties. But only in the last year has it been recognized by agriculturists, herbalists and holistic doctors as a totally effective and completely safe all-natural healer."

Biochemist Arnold Takemoto: "it [Olive Leaf Tea] sure has power; particularly against viruses that are more tenacious!" "It fills a hole that we haven't been able to fill before. It gives us a new, effective tool."

Customer References:

I have received your tea and am now drinking it daily. I am happy to tell you it helped clear up some kind of persistent cold like ailment I had been suffering from for months within two day's. I find Olivus tea delicious sweetened with a drop of Stevia." Kindest regards, Jason

"You could say that I've been taking olive leaf tea now for a few years, and I've never had a cold or flu in that time period. My girlfriend just had a bad flu that was dragging on for almost a month. After she took several cups of olive leaf tea for about three days, it knocked out the flu. Also it is good that your tea doesn't have caffeine in it. My girlfriend can't drink coffee or tea with caffeine, but she was able to drink the olive leaf tea. Thanks for your great product." Joel

"I've tested it twice by stopping taking it and each time my problems have returned and I get fatigued easily. Then I start taking it again and I pick up." D.H. "I drank the tea for three days and feel great now! I'm sold ;-)" Thanks again, CF

"After we received that tea from you, I, Margaret, got the strangest, deepest "cold" like sickness ever - I had it full blown and David started to get the symptoms when we remembered the olive leaf tea. We both started drinking it - I had the most lingering episode - but really cleansed - coughing a lot of mucous up - and David had the best results - I believe because he started sooner than I did with the tea - the symptoms never took hold for him and he never got whatever IT was. Thanks for the healing remedy." And blessings to you, Margaret Hiller

"I was surprised to get through last winter without a single cough, flu or even a runny nose. I don't need to carry a hankie anymore!" J.A. "I have increased energy and improved health." Troy P. "Goodbye sore throat!" Jo-Anne

"I do want to tell you that I will never be without olive leaf tea again. I became very ill last week. I serious lung infection. With no health insurance I take care of myself herbally. I began to drink a cup of the tea each day and within 3 days I was feeling much better. I'm sure I would have run into some serious problems had I not had the tea." Darlene

"After just five weeks I noticed a distinct increase in my energy levels and overall health. This improvement was not temporary, but has lasted to this day. P.H.

"My cholesterol levels are down... I am sleeping a lot better...my stress levels are much reduced..." Vic

"Since commencing Olive Leaf treatment my symptoms (chronic fatigue) are drastically reducing in severity. There is light at the end of the tunnel" I.F.

"I have had a history of asthma every winter. I had a particularly persistent bout of flu in 2000, which triggered several asthma attacks. This year I haven't had the slightest hint of coughs or asthmatic occurrences," Peter

* there is one side-effect, called the Herxheimer reaction or 'die-off' effect, which has been identified with olive leaf. When the olive leaf supplement kills off a large number of bacteria in a short space of time, the toxic by-products of these dying microorganisms are said to temporarily worsen the patient's symptoms, an allergic response (i.e., pain and swelling of the sinuses, Eustachian tubes in the ears, joints, etc.) Practitioners see die-off as positive and believe this reaction indicates the treatment is working effectively.

Safety Evaluation/Contraindications - This product should be avoided in pregnancy and lactation. Use with caution if you are allergic to Olive tree pollen as it may cause a seasonal respiratory allergic reaction. This herb may cause mild gastrointestinal irritation, particularly if taken on an empty stomach.

Known Drug Interactions - Olive leaf may potentiate the effects of blood pressure lowering medications and theoretically may interact with antidiabetic medications due to its potential to affect glucose levels. Further, this herb may interact with drugs that inhibit blood clotting and platelet aggregation, including but not limited to warfarin (Coumadin®), heparin, clopidogrel (Plavix®), pentoxifylline (Trental®), due to its potential effects in encouraging healthy blood formation and blood flow. Before using this formula, talk with your healthcare professional if you take any medications.
